Product information sheet

Vodafone Business IoT Easy Connect NB-IoT

☒ Internet

☐ Mobile

☐ TV

With the prepaid IoT tariff Vodafone Business IoT Easy Connect NB-IoT, you can use 1024 MB Data volume and 250 SMS per SIM card for a term of 10 years. You benefit from network coverage on our Vodafone networks as well as partner networks within Europe and the USA in the 2G, NB-IoT & LTE-M network.

You also get access to the IoT Easy Connect Portal, which you can use to manage and control your SIM cards at any time. If a SIM card does not have enough Data or SMS with the included volume, you can easily and conveniently reload your SIM card via the IoT Easy Connect portal. You will receive all invoices and order information directly via the portal. So take advantage of the opportunity to use our IoT SIM cards cost-effectively and efficiently. With a maximum speed of 256 kbit /s, you can network your applications securely and energy-efficiently in the Vodafone machine network.

You can read further details about the tariff, such as the list of available countries or technical specifications, in our service description and in our terms and conditions at https://www.vodafone.cz/firmy-a-korporace/internet-veci/.
Our offer is aimed exclusively at business customers based in Czech Republic.
